ORGANISMuseum features Ami Vitale “My Eyes, Your World”

Extraordinary images by one of the
most relevant modern photojournalist

Milan, March 10, 2007

Since 10th March 2007 ORGANISMuseum, the first Online Realtime 3D Virtual Art Gallery running inside Internet Browsers, either PC or MAC, is proud to host Ami Vitale's photographs. The inaugural exhibition by Gianmarco Chierigato will remain accessible through the exhibitions archive present on the website.

“My Eyes, Your World”

It often happens that words say something but tell nothing, and the same happens also to images. But once that Ami's photographs have started talking, it's no longer possible to stop them.

And some of these words really cannot escape our attention. Absolutely not.

Tears, pride, children, war, poverty, colors, hope, they are just some of these words and they take us by hand in a journey made of unique images coming from a world which is each day less far and owns, if we are able to see it, something that we have lost since a long time.

Up to you to discover what it is...

You can find the gallery at this address:
